To whom it may concern

Re: Briggs Amasco Reference

At present, Briggs Amasco are providing all the associated work in respect of roof coverage, lights and cladding needs at Melior Community College; a £19 million new build project on the existing school site.

From the initial contact with Briggs Amasco, we have found them to be helpful in all aspects of roofing works from the concept of the scheme a year ago, to actually being on site. We have found them to be extremely user friendly, both to ourselves as their client and to other sub contractors with whom they have an interface.

I would have no hesitation in using Briggs Amasco, Hull on my next project and would highly recommend them to other contractors.
