Subject: Sponsorship of the Development of the new family social area

Thank you very much for contributing to our new family area. The money has been used to create a safe area for parents and children to socialise safely next to the Pavilion. It enabled us to convert a piece of land that wasn't being used into something that will offer lasting benefit to the community.

The long term benefits are significant, helping us to create a sustainable facility that's used for sport and physical activity as well helping to generate the club income that's reinvested back into the facility. We have already seen the benefit from it being used by parents and children for matches as well as recent events such as the 6 a side, charity fun day and county cricket matches. The area has been built so that in the future we could use it as a covered space for events and activities.

Thank you very much for your support

Kind regards,

Richard Twigg
Chairman
